

Welcome to

UK Remediation Ltd.

Contaminated land experts in on-site remediation and off-site soil disposal

UK Remediation Ltd are a contaminated land business providing complete turnkey solutions for the regeneration of brownfield sites. Our unique expertise in on-site soil and groundwater remediation, off-site soil disposal and sustainable waste management offers our clients greater flexibility and highly cost effective and efficient remediation solutions.

OUR SERVICES:

On-site Remediation

We offer sustainable and proven on-site remedial solutions for remediation of both contaminated soil and groundwater. Our in-house expertise ensures that the full range of in-situ and ex-situ treatment techniques are considered to form a robust remediation strategy to meet client needs. We guarantee to obtain regulatory approval for the remedial works we undertake so that our clients are able to proceed with their developments without delay.

Soil Removal and Disposal

UK Remediation have the unique benefit of owning and operating a Fixed Soil Treatment Facility (FSTF), which is exempt of higher rate landfill tax, thereby enabling us to offer considerable savings on disposal of hazardous and non-hazardous soils. Situated close to Exeter and the M5, UK Remediation FSTF is the only hazardous soil treatment facility in the South West, ideally placed to reduce transport and disposal costs. Our hazardous waste management licence enables us to treat a range of contaminants and soil types.

Waste Management – fully permitted & licensed

We are certified waste brokers and fully versed with waste legislation and regulation of bulk materials. UK Remediation have a network of disposal points for hazardous, special and difficult waste streams including asbestos, Japanese knotweed and Himalayan Balsam. These can be dealt with by our fully trained staff. Specialist transport and containers are provided and all waste is taken to appropriately licenced treatment facilities and waste recovery centres.

“A non-biased remediation strategy approach utilising both expertise in on-site remediation and off-site soil disposal”

COMPANY OVERVIEW

UK Remediation Ltd were established in 2009 in Bristol by a team of contaminated land specialists providing bespoke on-site remediation contracting services nationwide (soil and groundwater) combined with operating an off-site Fixed Soil Treatment Facility in Exeter. Since then the company has been delivering successful remediation solutions on time and budget working closely with its clients from tendering to completion to ensure they are fully informed about every project stage.

Our experienced staff hold a range of associated qualifications including WAMITAB, CWEM and SiLC. UK Remediation Ltd can offer the following services:

- A free review of any available site investigation data and provision of a budget disposal cost or outline remedial strategy proposal to assist in the feasibility assessment of a scheme;
- The full range of remedial techniques such as bioremediation and stabilisation of contaminated soil plus in-situ chemical treatment of impacted groundwater to minimise the volumes of off-site disposal;
- Flexible approach to projects to suit your requirements including fixed price lump sums;
- A guarantee that we will obtain Regulatory approval for the remedial works we undertake;
- We have never failed to complete a project but we hold £5m public/products liability insurance cover.

Cleaning & Clearing Contamination

Our senior staff have over 30 years' experience in soil and groundwater remediation. This includes all recognised forms of chemical, biological and physical remediation processes. We have previous experience in range of industries such as civil engineering, groundworks, process engineering and consultancy.

Innovative Solutions

We apply a wide range of powerful and proven solutions for the treatment of contaminated soil and groundwater. These technologies cover the range from chemical, physical and biological techniques. More detail can be found on our website www.ukremediation.co.uk

Cost Effective & Reliable

UK Remediation are fully committed to offering the most cost effective solutions to all contamination/remediation problems. We offer our clients very competitive quotes for all of their remediation needs.
